

TYLO

## ABOUT

We are Tylo Fittings Ltd

A full-service design and consulting bathroom firm  
Specializing in bathroom architecture, quality assurance and  
expert clientele testimony.

We ensure sound design and legal compliance throughout a  
bathroom's lifespan, from cradle to grave.

## PROCESS

### 01. Initial Discovery

-our job is to the what,why and who questions on the path to uncover truth behind design decisons and construction defects

### 02. Research Synthesis

-from conceptualizing,drawing,visual representation to installation of fittings,we examine every findings using a variety of filters to validate our recommendations

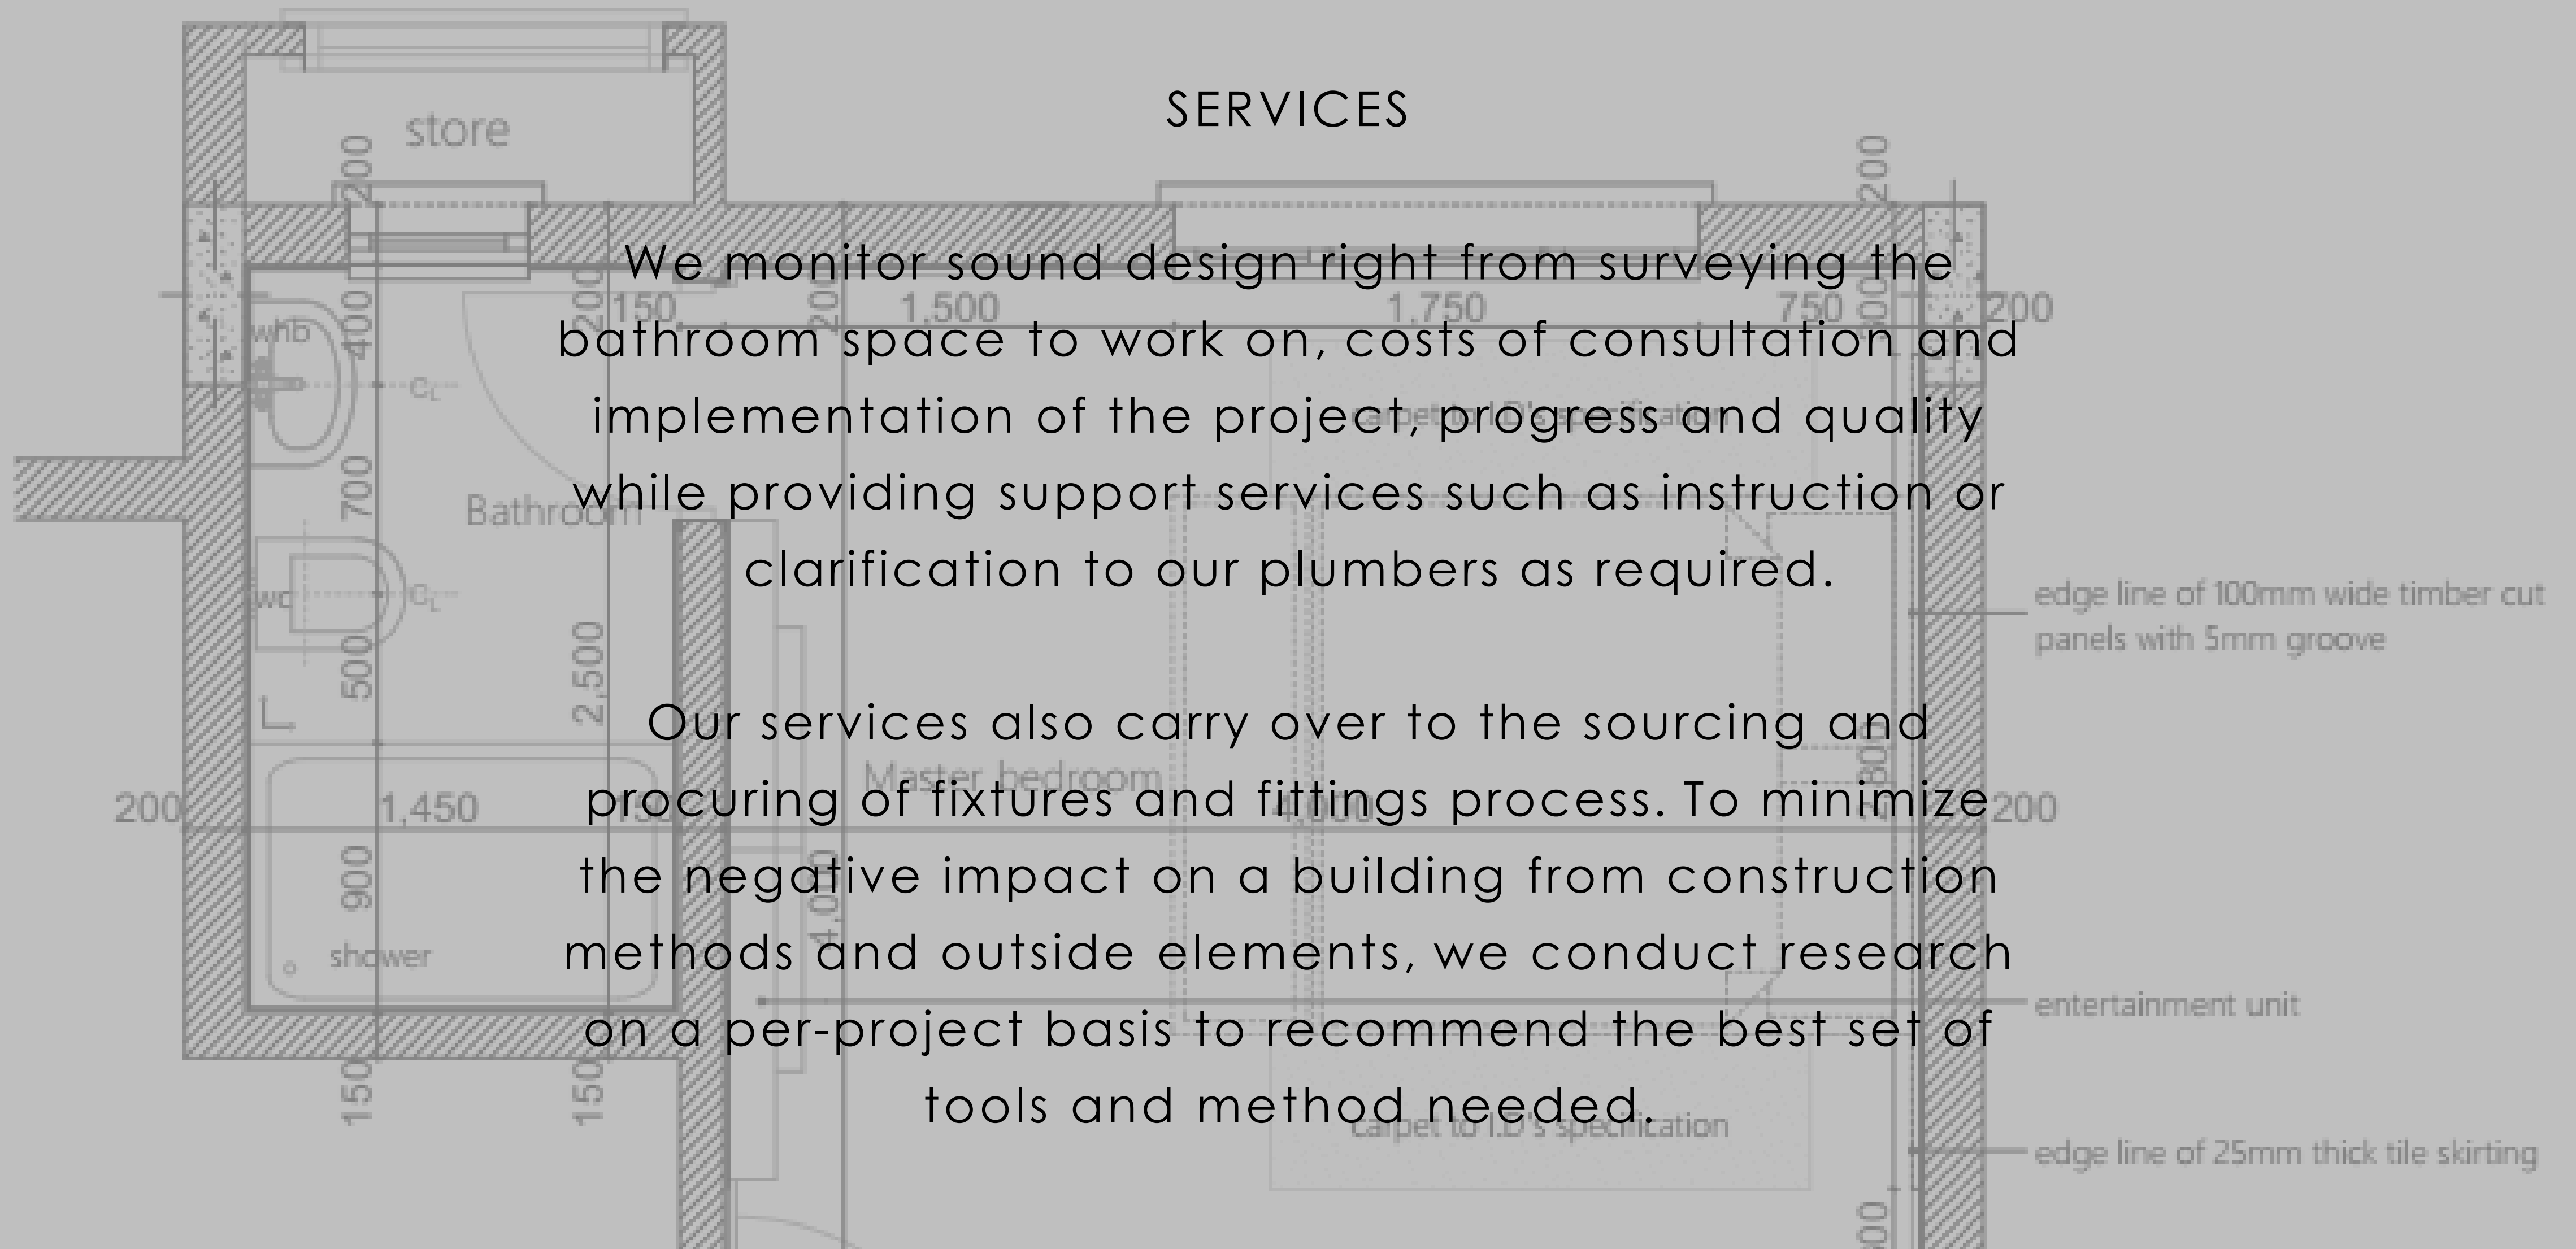

### 03. Final Recommendation

-our reports include detailed issue descriptions and resulting damages to ensure the integrity of subsequent constrcution efforts

## SERVICES

We monitor sound design right from surveying the bathroom space to work on, costs of consultation and implementation of the project, progress and quality while providing support services such as instruction or clarification to our plumbers as required.

Our services also carry over to the sourcing and procuring of fixtures and fittings process. To minimize the negative impact on a building from construction methods and outside elements, we conduct research on a per-project basis to recommend the best set of tools and method needed.
